Thanks

 Add class comment...

The first method to post to the Stream is to:

“Share something with your class”

This will allow you to post to the Stream in a similar way that Facebook allows you to post to a wall. Posts are available to other members of the class and deleted content is always viewable to members of staff.

When you click in the box it will extend and provide you with some extra options.

Any pictures can be attached here using the Add icon below.

Thanks

Add class comment..

The next method to post on the stream is by commenting on an already existing post.

Not all posts will be available to be commented on. The option to comment will be shown by pressing

“Add class comment”

Can we please ask that pupils try to upload multiple photographs etc in one post.

Otherwise the streams become very cluttered and push the daily work set by teachers down the page.
