

# Eco Council 2020 Autumn Newsletter

Our school's Eco Council is working towards our Bronze Award.

We are proud to be close to achieving this award. The Eco Council lead the way in order to promote a 'Green Environment'. The three areas we are focusing on developing this year are:

- Biodiversity
- School Grounds
- Energy

We hope to develop the outdoor areas of our school, focusing on increasing wildlife and outdoor learning. We have started these projects by creating a school garden and an outdoor classroom that we have named 'The Log Cabin'. Children and staff love opportunities to develop and enhance outdoor learning. We are already enjoying these spaces and starting to see more wildlife..

We also hope to reduce our Energy consumption this year. Therefore, this half term we will be selecting Energy Monitors for each class, who will have the responsibility for ensuring lights, computers and interactive whiteboards are switched off when not in use at break and lunch time. The Eco council will then undertake a termly spot check and rate each class room, red, amber or green. The classes that are green will earn a reward!

We will be sending out Eco Council Newsletters termly to update you on our progress. But don't forget to check out our website for any recent news!
